IITC/ACAT Side-Event: Screening of Documentary “Circle of Poison”

http://www.circleofpoisonfilm.com/seethefilm
The US Environmental Protection Agency reported in 2012 that in 2010 there were facilities in 23 US states manufacturing pesticides which are not registered for use in the US (for export only) in response to a FOIA request from IITC and AEHR.
BANNED AND RESTRICTED PESTICIDES MANUFACTURED IN AND EXPORTED FROM THE UNITED STATES

Number of facilities in each state that produce banned & restricted pesticides for export (map prepared by AEHR)

INTERNATIONAL INDIAN TREATY COUNCIL
CONSEJO INTERNACIONAL DE TRATADOS INDIOS
The Rotterdam Convention (and US law) allows the US to export chemicals whose use they prohibit in the US as long as they inform the importing country of their status.

"Just because something is not illegal, it may still be immoral. Allowing the export of products recognized to be harmful is immoral"

-- UN Special Rapporteur on the Adverse effects of the illicit movement and dumping of toxic and dangerous products and wastes on the enjoyment of human rights, Ms. Fatma-Zohra Ouhachi-Vesely on her 1st country visit to the US, December 2001
Pesticides and Community Health, Rio Yaqui, Sonora Mexico

“The airplanes spray chemicals on the crops, and it affects the town and its inhabitants. In and around the whole town there are large tanks holding hazardous chemicals. Many people have died here.”

-- Testimony submitted to IITC by a 48 year old mother of 6, Potam Pueblo, Rio Yaqui Sonora, October 19, 2003

This is a matter of life and death for Indigenous Peoples around the world.

Cristian Molina age 13, died May 15th, 2008, shown with his mother in Potam Pueblo Sonora Mexico 2006

Juan Antonio Rodriguez, age 2, died April 11, 2013, shown with his grandmother in Vicam Rio Yaqui Sonora Mexico; January 2013
“Mrs. Flor Reyna, the mother of a young woman who was born with deformities. Currently the young woman is 30 years old and is 1.20 meters [3’11”] tall. She says that when her daughter was born, the child’s body was WATERY and JELLY-LIKE. The girl, due to her scant growth, is unable to move her legs. She can only move her arms. Her vital organs are atrophied. Studies conducted on her reveal that the girl developed deformities while in her mother’s womb.”

The midwife, Sra. Jesús made the following comments: “These deformities are the product of tumors produced by chemicals when young women are exposed to their application while working in the field without personal safety measures or other similar protection”.

--- Testimony received by IITC from Jittoa Bat-Natika Weria, Rio Yaqui Sonora Mexico, December 15th 2011
The UN General Assembly Adopts the Declaration on the Rights of Indigenous Peoples, September 2007

Geneva, 1977

UN General Assembly
September 13th, 2007
New York
The Declaration is the “Minimum Standard”

“The rights recognized herein constitute the minimum standards for the survival, dignity and well-being of the indigenous peoples of the world.”

--Article 43
“Indigenous peoples have the right to maintain and develop their political, economic and social systems or institutions, to be secure in the enjoyment of their own means of subsistence and development, and to engage freely in all their traditional and other economic activities.”

Traditional Fishing Deschutes River, Oregon, photo by Mark McBrearty
“Indigenous peoples have the right to their traditional medicines and to maintain their health practices, including the conservation of their vital medicinal plants, animals and minerals. Indigenous individuals also have the right to access, without any discrimination, to all social and health services.”

– Article 24
Indigenous Women & Girls are Disproportionately Impacted

- POPs stored in fatty tissue, fat cells are endocrine disruptors, impact reproductive capacity
- Indigenous women’s central role in traditional food gathering/ preparation and cultural practices
- Indigenous lands targeted

In February 2008, CERD called upon the US to take appropriate legislative and administrative measures to prevent transnationals it registers “from negatively impacting on the enjoyment of rights of indigenous peoples in territories outside the United States.”

[CERD/C/USA/CO/6]

“Exports included 27 million pounds of pesticides per year whose use is forbidden in the US”
16. Considering their impact on the sexual health and reproductive rights of indigenous peoples, the Permanent Forum calls…for a legal review of United Nations chemical conventions, in particular the Rotterdam Convention, to ensure that they are in conformity with international human rights standards, including the United Nations Declaration on the Rights of Indigenous Peoples and the Convention on the Rights of Persons with Disabilities.
UN Convention on the Rights of the Child

1. States Parties recognize the right of the child to the enjoyment of the highest attainable standard of health...

2. States Parties shall pursue full implementation of this right and, in particular, shall take appropriate measures:
   (c) To combat disease and malnutrition, ...through the provision of adequate nutritious foods and clean drinking-water, taking into consideration the dangers and risks of environmental pollution;

-- Article 24
In June 2015, the UN Committee on the Rights of the Child recognized “Environmental Health” as a new human rights category for the protection of children’s and maternal health.
The CRC recommended that Mexico:

(a) Assess the impact of air, water, soil and electromagnetic pollution on children and maternal health as a basis to design a well-resourced strategy at federal, state and local levels, in consultation with all communities and especially indigenous peoples, to remedy the situation and drastically decrease the exposure to pollutants;

(b) Prohibit the import and use of any pesticides or chemicals that have been banned or restricted for use in exporting countries;

(c) Further examine and adapt its legislative framework to ensure the legal accountability of business enterprises involved in activities having a negative impact on the environment, in the light of its general comment No. 16 (2013) on State obligations regarding the impact of the business sector on children’s rights.
“Indigenous women are life givers, life sustainers and culture holders. Our bodies are sacred places that must be protected, honored and kept free of harmful contaminants in order for the new generations of our Nations to be born strong and healthy.”
